REVIEW OF OPERATIONS

The loss of the Group for the half-year ended 31 December 2010, after income tax amounted to \$438,967 (2009: \$409,397).

The Company's principal objectives continue to be to: (1) evaluate the 100% owned oxide gold prospects on and within economic trucking distance of the Nagambie Mine, targeting a minimum of 100,000 to 200,000 ounces of gold; and (2) develop all the construction material opportunities at the Nagambie Mine, including the sale of overburden and tailings and the commercialisation of the sand deposits.

The purchase of 100% of the Laura Mine tenement (MIN 4465) at Redcastle was completed during the half year and planning of 2011 work programs (costeaming and drilling) for the total Redcastle Goldfield has been carried out.

A revised Work Plan for exploration drilling at Nagambie North was lodged with the DPI and the program is scheduled to commence in March 2011.

The Company applied for four exploration licences to ensure adequate tenure over possible extensions/repeats of gold mineralisation at Redcastle and Nagambie.

A Work Plan Variation to develop a new gold open pit at the Nagambie Mine along strike to the west of the current West Pit is in preparation.

Abigroup, the main contractor for the Nagambie Bypass, commenced excavating and trucking undifferentiated rock fill from the Western Overburden Dump at the Nagambie Mine at 2,000 cubic metres per day late in the half year before heavy rains in the area caused a cessation of the work.

An 80 acre parcel of surplus freehold land to the east of the Nagambie Mine has been leased to Australian Native Landscapes Pty Ltd ("ANL") at commercial rates. Nagambie Mining is well placed to provide rock fill during the construction of ANL's proposed Green Organics Recycling Facility and provide sand during the operational phase.

Nagambie Mining revenue from sales of non-gold materials from the Nagambie Mine during the half year was a record at \$109,186 and it is anticipated further growth will be achieved over calendar 2011.

This report is signed in accordance with a resolution of the directors:

Michael Ward Trumbull
Non-Executive Chairman

NOTES TO AND FORMING PART OF THE FINANCIAL STATEMENTS FOR THE HALF-YEAR ENDED 31 DECEMBER 2010

1. BASIS OF PREPARATION OF HALF-YEAR FINANCIAL REPORT

The half-year consolidated financial statements are a general purpose financial report prepared in accordance with the requirements of the Corporations Act 2001, Australian Accounting Standard AASB 134: Interim Financial Reporting, Australian Accounting Interpretations and other authoritative pronouncements of the Australian Accounting Standards Board.

The half-year financial report does not include all the notes and full disclosures of the type normally included in an annual report. It is recommended that this financial report be read in conjunction with the 2010 annual report and any public announcements made by Nagambie Mining Limited during the half-year in accordance with continuous disclosure requirements arising under the Corporations Act 2001.

The accounting policies have been consistently applied by the entities in the consolidated group and are consistent with those in the June 2010 financial report.

Going Concern

For the half year ended 31 December 2010 the consolidated net loss was \$438,967 (2009: \$409,397), which increased total accumulated losses to \$9,218,249 (2009: \$8,203,347). The net cash outflows from operations for the half year were \$276,619 (2009: \$300,520). The Group has capital commitments extending to 31 December 2011 of \$569,980 (2010: \$546,100).

The directors have assessed the current cash balances available to the entity, along with the operating and capital expenditure plans and expected obligations over the next 12 months and the anticipated growth in sales of non-gold materials from the Nagambie Mine. If necessary, the Group has capacity to meet its financial commitments through the following:

- Reclaiming cash-backed environmental bonds for mineral tenements with the Victorian Department of Primary Industries ("DPI") and therefore foregoing any capital commitments on those tenements surrendered; and
- Scaling back its administrative and corporate costs.

This financial report does not include any adjustments relating to the recoverability and classification of recorded asset amounts or to the amounts and classification of liabilities that may be necessary should the Group be unable to continue as a going concern.

3. CONVERTIBLE NOTES

On the 13 September 2010, the Group issued 25,000,000 convertible notes at 4.0 cents each to sophisticated and professional investors, raising a total of \$1,000,000. The principal terms of the notes are:

- Interest payable every 6 months at a rate of 10% per annum;
- Notes convertible 1:1 into fully paid ordinary shares at any time within the maximum 5-year life of the notes at the option of the holder;
- Notes redeemable in cash in full after 5 years if not converted;
- Notes are unsecured but rank ahead of shareholders; and
- Notes are protected for reorganisation events (bonus issues, share consolidations etc.).

4. DIVIDENDS PAID OR PROVIDED FOR

No dividends have been paid or provided for during the half-year (2009: Nil).

5. SHARE OPTIONS

No options were exercised during the half-year, and no options expired unexercised during the half-year.

During the half-year 4,000,000 options were issued to Directors and Officers, all exercisable at 10c per share. The share options vest two years after their grant date and issue date being 23 November 2010 and expire 5 years from grant date.

6. SEGMENT REPORTING

The Group operates in one business segment, being the exploration of mineral resources in Australia.

ABN 42 111 587 163

NOTES TO AND FORMING PART OF THE FINANCIAL STATEMENTS FOR THE HALF-YEAR ENDED 31 DECEMBER 2010

7. COMMITMENTS FOR CAPITAL EXPENDITURE

The Group holds tenements which have minimum capital expenditure requirements. In order to satisfy those requirements the Group has budgeted to spend \$569,980 for the 12 months ended 31 December 2011 and thereafter it expects to spend approximately \$550,000 every 12 months, indexed for CPI inflation, for as long as it maintains its current portfolio of tenements.

These tenements also have environmental clauses that require the company to restore the disturbed area of interest back to a condition that satisfies the Victorian Department of Primary Industries. As the Group plans to hold onto its existing tenements indefinitely, no allowance has been made in the statement of financial position for any obligation that may arise should the Group decide not to continue holding any of its tenements.

8. CONTINGENT LIABILITIES

There has been no change in contingent liabilities since the last annual financial report (2009: Nil).

9. EVENTS SUBSEQUENT TO BALANCE DATE

In the opinion of the directors of the company, there has not arisen in the interval between the end of the half year and the date of this report any other item, transaction or event of a material and unusual nature likely to substantially affect the results of the operations or state of affairs of the Group in the subsequent financial year.

Our responsibility is to express a conclusion on the half-year financial report based on our review. We conducted our review in accordance with Auditing Standard on Review Engagements ASRE 2410 *Review of an Interim Financial Report Performed by the Independent Auditor of the Entity*, in order to state whether, on the basis of the procedures described, we have become aware of any matter that makes us to believe that the interim financial report is not in accordance with the *Corporations Act 2001* including giving a true and fair view of the Group's financial position as at 31 December 2010 and its performance for the half-year ended on that date; and complying with Accounting Standard AASB134 *Interim Financial Reporting* and the Corporations Regulations 2001. A review of a half-year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. Based upon our review, which is not an audit, we have not become aware of any matter that makes us believe that the half-year financial report of Nagambie Mining Limited and controlled entity is not in accordance with the *Corporations Act 2001*, including:

- (i) giving a true and fair view of the Group's financial position as at 31 December 2010 and of its performance for the half-year ended on that date; and
- (ii) complying with Accounting Standard AASB134 *Interim Financial Reporting* and the Corporations Regulations 2001.

Inherent Uncertainty Regarding Continuation as a Going Concern

Without qualification to the conclusion expressed above, attention is drawn to Note 1 to the interim financial report, which indicates that the Group incurred a loss of \$438,967 (2009: loss of \$409,397) during the half year ended 31 December 2010, and generated net cash outflows from operations of \$276,619 (2009: \$300,520). These conditions along with other matters set forth in Note 1 indicate that there is a material uncertainty that may cast doubt regarding whether the Group will be able to continue as a going concern and therefore whether it will realise its assets and extinguish its liabilities in the normal course of business and at the amounts stated in the financial report.
